Re: USX Lands, Iron Springs District,
Iron County - File #0021-003

Dear Mr. Wham:

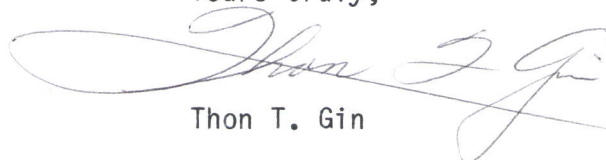

USX has completed the reseeding of all areas identified by Frank Filas and Frank Jensen during their site inspection of June 10, 1987, as having insufficient vegetative growth from the initial seeding associated with our mine reclamation program. The native plant mixture used for reseeding comprised:

- 23% Atriplex canescens
- 8% Chrysothamnus nauseosus
- 15% Medicago sativa
- 31% Melilotus officinalis
- 15% Agropyron desertorum
- 8% Oryzopsis hymenoides

Areas reseeded include the Desert Mound plant site, Mountain Lion north dump, Blackhawk Mine fines dump and mine road, and the rail siding storage site for Blackhawk fines. The procedure followed for reseeding was (1) harrow with spring tooth harrow, (2) broadcast seed, (3) reharrow with spike tooth harrow. With regard to the six-mile haulage road between the Mountain Lion mine site and the Desert Mound plant site, Iron County has resolved to acquire the roadway for county use (copy of resolution enclosed).

We would appreciate your advice as to what time period should elapse before reinspection of the site can be carried out.

Yours truly,

Thon T. Gin
